### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3651

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22, 24 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Schroeder et al. (U.S. Patent 5,238,099).

Schroeder et al. show a roller-top belt 12 arranged to travel in a first loop and having rollers 30 extending beyond inner and outer sides of the belt (see figure 3) and a drive belt 40 which travels in a second loop inside the first loop whose outer surface is positionable into driving contact with rollers 30.

Re claims 24 and 25, it is inherent that the rollers and belt 40 are of suitable high-friction material such there is not slippage between the two.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schroeder et al. in view of Costanzo (U.S. Patent 6,758,323).

Schroeder et al. do not show rollers 30 as having axles. However, shown by Costanzo are transfer rollers 40 in Figure 4 that have axles. To include rollers with axles on Schroeder et al. would have been obvious to one of ordinary skill in the art as it

might provide more control over the direction the rollers cause the engaged article to move.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Claims 1-21 are allowed.
